[The text content is too long to be presented here in full. It contains detailed information on the procedures and specifications for the installation and abandonment of sewers, including specifications for lining, plugging, and abandonment. The text refers to various parts of the sewer system, such as plugs, linings, and valve installation. It also includes references to specific dimensions and materials, such as steel and concrete. The text is technical and detailed, with many references to specific steps and procedures.]

[The text continues with detailed instructions on the installation and abandonment of sewers, including the use of plugs, linings, and valves. The text contains numerous references to specific dimensions, materials, and procedures. It is a detailed and technical document, likely intended for use by those involved in the installation and maintenance of sewer systems.]

[The text concludes with a summary of the procedures and specifications, including the importance of maintaining and testing the sewer systems. It emphasizes the need for thorough testing and inspection to ensure the safety and functionality of the systems. The text also highlights the importance of adhering to the specifications and procedures to ensure the longevity and reliability of the sewer systems.]

[The text concludes with a closing statement, emphasizing the importance of the procedures and specifications outlined in the document. It underscores the need for continued maintenance and testing to ensure the safety and functionality of the sewer systems.]
