The following is a portion of the Sammamish Plateau Water and Sewer District’s installation specifications. It includes general sewer main specifications, installation requirements, and details for the District’s Sewer System, which includes gravity sewer mains, pressure sewer mains, manholes, vaults, and other facilities. The information is intended to provide guidance for the installation of sewers and related infrastructure. This document contains detailed instructions for installing sewer systems, ensuring compliance with District requirements, and providing necessary information for a successful installation. It is essential to follow these specifications closely to ensure the proper functioning of the sewer system.
